FY2025 Business and Cloud Infrastructure Review

Executive summary

Revenue grew every quarter of 2025, from $12.4M in Q1 to $24.3M in Q4, a total of $70.5M for the year. Q4 was the strongest quarter, up 30% over Q3 ($18.7M), driven by enterprise renewals and the launch of the analytics add-on. Revenue roughly doubled between Q1 and Q4.

1. Quarterly revenue

Figure 1 shows quarterly revenue. Growth was steady: Q2 rose 22% over Q1, Q3 rose 24% over Q2, and Q4 rose 30% over Q3. Growth accelerated each quarter.

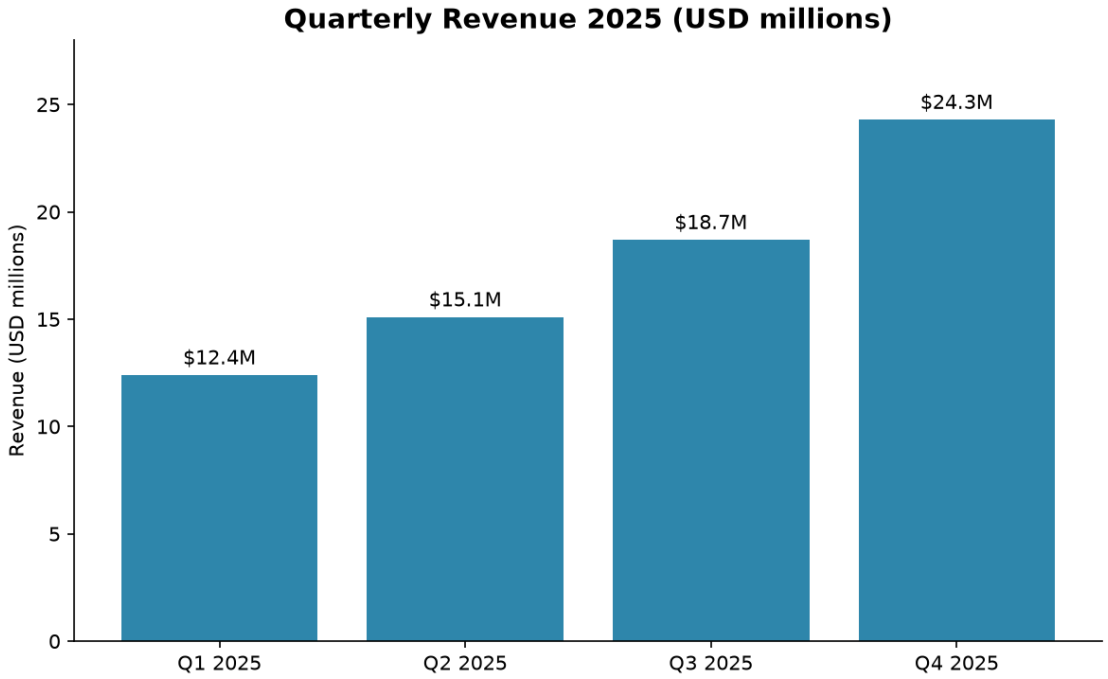

Figure 1: Quarterly revenue 2025 (USD millions). Q1 $12.4M, Q2 $15.1M, Q3 $18.7M, Q4 $24.3M.

2. Revenue by region

North America remains the largest market at 42% of revenue, followed by Europe (28%) and Asia Pacific (22%). Rest of World contributes 8%. Asia Pacific is the fastest-growing region and is the focus of 2026 expansion.

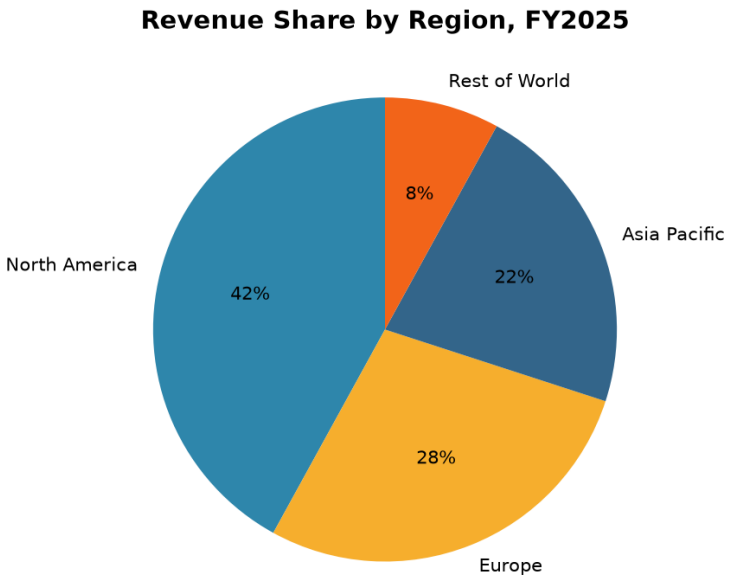

Figure 2: Revenue share by region, FY2025.

3. Cloud architecture

The platform runs as a three-tier web application on AWS inside a single VPC (10.0.0.0/16). Users resolve the site through **Route 53**; static content is cached by **CloudFront**. Requests reach an **Application Load Balancer** in the public subnet, which distributes traffic to **EC2 Auto Scaling** groups running in private subnets across two Availability Zones (AZ-a and AZ-b). Application data lives in a **Multi-AZ RDS MySQL** database, and static assets are stored in an **S3** bucket.

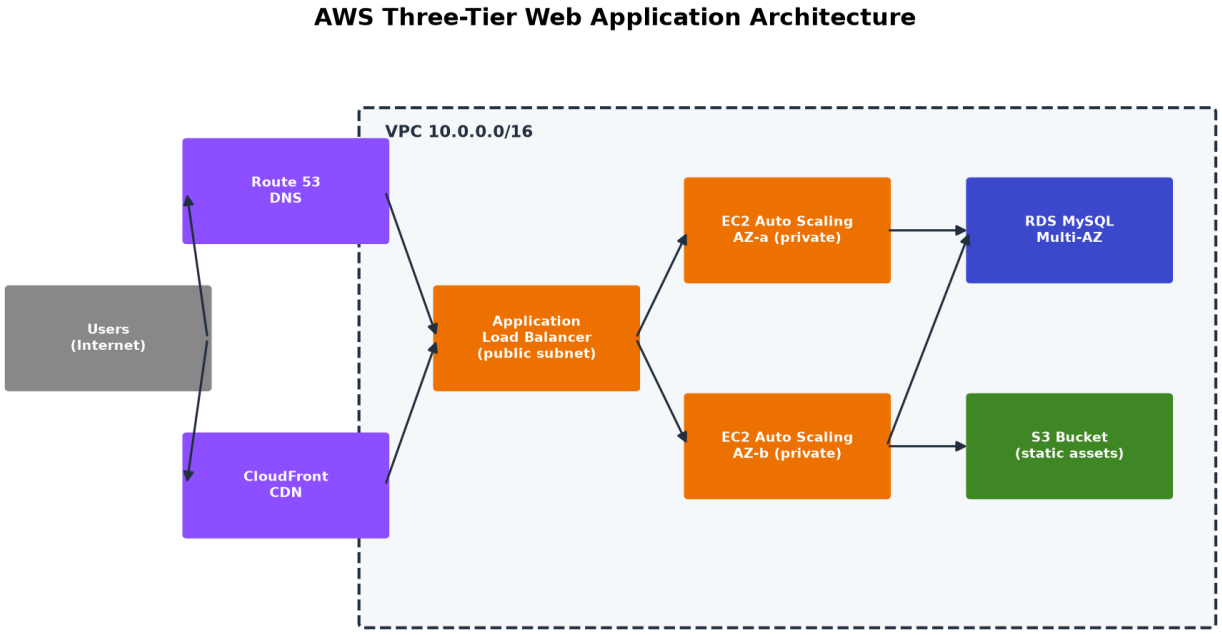

Figure 3: AWS three-tier architecture: Route 53, CloudFront, ALB, EC2 Auto Scaling, RDS, S3.

Security and resilience

Security groups allow only HTTPS (443) to the load balancer. The EC2 instances accept traffic only from the ALB security group, and the database accepts MySQL (3306) only from the application tier. Multi-AZ deployment of EC2 and RDS removes any single point of failure.

4. Cloud cost

Monthly AWS spend totals $76K. Compute is the largest line item at $38K (50%), then Storage ($17K), Data Transfer ($12K) and Support ($9K). Reserved Instances and S3 lifecycle policies are planned to cut costs by roughly 15%.

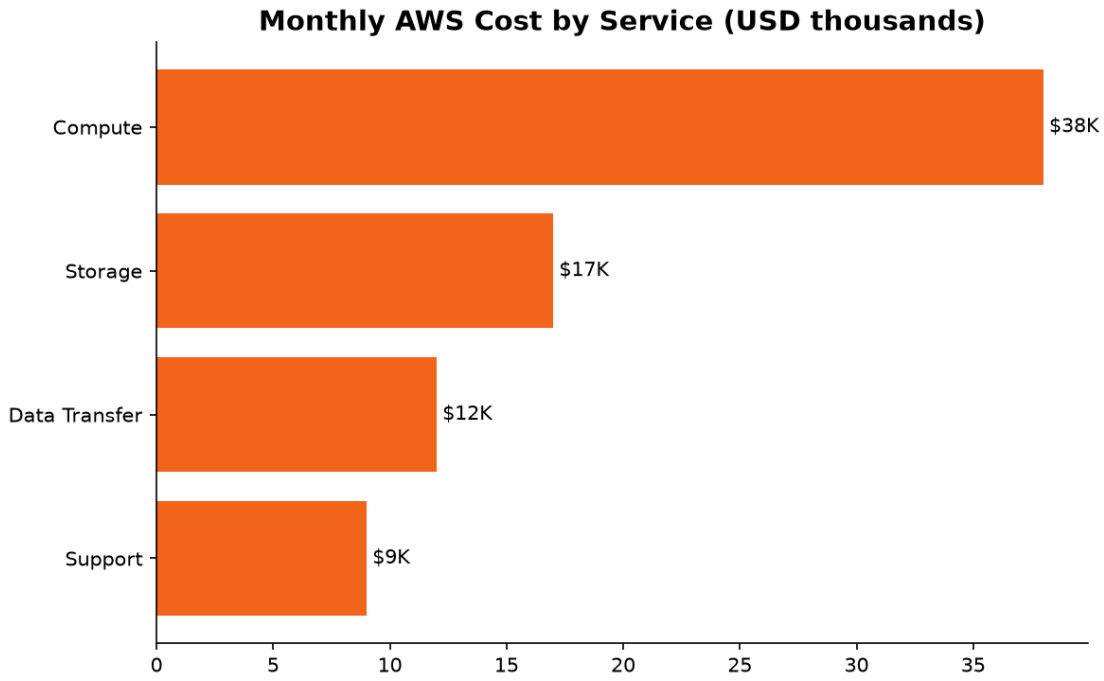

Figure 4: Monthly AWS cost by service (USD thousands).

Appendix: revenue table

Quarter	Revenue (USD M)	QoQ growth
Q1 2025	12.4	-
Q2 2025	15.1	+22%
Q3 2025	18.7	+24%
Q4 2025	24.3	+30%
